STATINTL

Dear

Thank you for your phone call of April 25, 1966, we are sending you a packet containing sample swatches of our Chicopee Fiberglass Screen, Chicopee Lumite Saran Screen, color brochure, and price list.

We understand that in your work as a mechanical engineer you plan to use this screening as a heavier or stiffer material to lead a fabric through rollers, and we feel sure that you can use one of our constructions for this purpose.

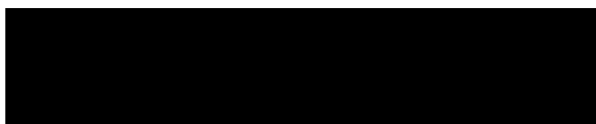

After you have had an opportunity to examine this packet, please let us know if you have any further questions.

STATINTL

Sincerely yours,

CHICOPEE MANUFACTURING COMPANY

FIBERGLASS SCREENING

FOR:

WINDOWS . . . DOORS . . . PORCHES . . .
PATIOS . . . FLORIDA ROOMS . . . SWIMMING
POOL ENCLOSURES . . . VENT SCREEN
INSTALLATIONS . . . INDUSTRIAL USES

Dear Customer:

As you know Chicopee is the largest weaver of fiberglass screen in the United States. During the past several years, Chicopee has sold screening both directly to our customers and through another corporation. The majority of our sales in most areas have been through another corporation; however, Chicopee is now expanding sales directly to the customer, and we are actively soliciting business more aggressively than we have in the past.

We at Chicopee pride ourselves on first of all our quality, secondly service, and third we always charge a fair price and a competitive price for our product.

The purpose of this letter is to bring to your attention that we are actively soliciting business for Chicopee Fiberglass Screen in your area and certainly appreciate the opportunity to supply your future requirements.

We maintain at all times an inventory of several million square feet in all widths, mesh, and colors for immediate shipment. We are currently in the process of setting up local distribution; however, in the meantime we would appreciate your directing your orders to our plant in Buford, Georgia.

If we can be of service to you, please do not hesitate to write, wire, or call us at: Chicopee Manufacturing Company

CPYRGHT

Chicopee fiber glass screening can be ordered directly from the factory or any of several regional manufacturer's representatives throughout the country, according to Glen Gasaway, Product Director of Chicopee Manufacturing Company's Buford, Georgia Plant. Some manufacturers, patio builders and hardware stores apparently have been under the impression, we are unable to accept their orders. We not only accept these orders, but are most grateful for the opportunity to service all accounts for Chicopee fiber glass screen.

Chicopee Manufacturing Company, the largest weaver of fiber glass screening in the U.S., makes all standard widths, colors and constructions, and will make special widths and colors to order. "Service for the screen manufacturing, hardware trade and building supply dealers is the keynote of our operation," says Mr. Gasaway.

Quality features such as high impact resistance, resistance to fire, heat and rust, plus better visibility and long-lasting beauty without painting have earned a steadily increasing share of the screen market for Chicopee fiber glass screening. Company officials point out that it will

not shrink or stretch, and exhaustive tests by Chicopee Manufacturing Company and independent testing laboratories show that pound for pound, it is stronger than steel.

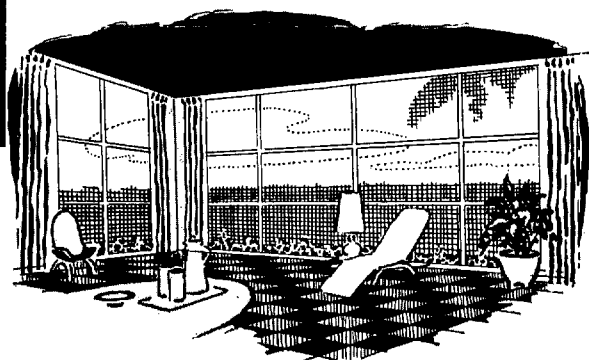

The product is widely used for windows and doors, porches, patios, Florida rooms, swimming pool enclosures and tents. It has manifold industrial uses. "We keep all standard widths, colors and constructions in stock, ready for immediate delivery," said Mr. Gasaway. "Mesh sizes from 4 x 4 up can be procured by ordering 10,000 or more lineal feet."

Special sales and merchandising aids are available to all dealers which includes a handy calculator by which the price on any length or width screening can be figured instantaneously. In addition, there are envelope stuffers, sample swatches and radio commercials; and Chicopee has available a display rack for five, 100' rolls of screening that takes up only 2' x 3' of floor space.

Order Chicopee fiber glass screening direct from the factory in Buford, Georgia, or write for the name of the manufacturer's representative nearest you.

**Finest QUALITY and Better SERVICE
FROM AMERICA'S LARGEST
FIBER GLASS SCREEN WEAVER!**

Chicopee
FIBER GLASS SCREENING

- WON'T RUST, DENT, SHRINK
- MOST DURABLE ● STRONGEST
- NEVER NEEDS TO BE PAINTED

Chicopee Fiber Glass Screening is neither metal nor plastic . . . but screening made of glass with a vinyl coating. It is preferred because it will not dent, shrink, stretch, corrode or rust. It is resistant to salt air and industrial fumes, and will not cause sidewall staining.

*Designed for Longer Lasting Performance . . .
All Climates. Designed to Sell Better!*
